Sharing is caring

Design-tech collaboration is key

Bottoms up

Solar design is contextual

Pretty pleases

Expanding the material aesthetics of solar energy

It works both ways

Turning consumers of commodities into prosumers

Power to the objects

Solar design for energy-sensitive interactions

All them feels

Solar design follows a holistic approach

Sun solutions

Sustainable material & strategies

Sun-centric

A global solar future

We believe the sun is the most natural and humane source of electricity. It's the answer to the smaller question (How to power our life?) and the Big one (How to live it?). As designers, those are the exact questions we pore over every day. How to rhyme the purely practical with societal issues. How to make things and make them meaningful. Well. With Solar. Sign our manifesto and join the movement.
